

DELCO-LIGHT

"Electricity for every Farm"

The Delco-Light engine is the valve-in-the-head type—used in the best and most powerful airplane engines and in hundreds of thousands of automobiles.

It is air-cooled—runs on kerosene in any climate—has only one place to oil and has a simple mixing valve in place of carburetor.

The storage battery is exclusively designed and built for Delco-Light with thick plates, wood and rubber separators and many improvements that insure long life.

Delco-Light long ago passed the experimental stage and has gone through the refining influence of three and one-half years of production and of usage by 75,000 customers.

You will find plants in the homes of your community. Just ask your neighbor about his Delco-Light plant.

Delco-Light makes happy homes; it saves time and labor, taking away lots of hard, unpleasant tasks. It "Pays for Itself" by the work it does and the time it saves.

Of the more than 75,000 Satisfied Users of Delco-Light, the first are among the most enthusiastic—proof that the simplicity and durability of Delco-Light meets the requirements of its customers.

Mr. and Mrs. U. S. Rose entertained Thursday at a six o'clock dinner in honor of their twentieth wedding anniversary. Twenty plates were laid and it proved a most delightful occasion.
